**Front cover:** Montage showing ratling, approximately 14 days old, being held in an adult human hand (center); fluorescein angiograph showing hyaloid system in a similar newborn rat (above); and Dr. John S. Penn (lower photograph), examining a ratling at an inverted microscope which was used to obtain retinal fluorescein angiography in newborn rats. (See "Study of Ocular Vasculature in the Newborn Rat: Retinal Fluorescein Angiography Using an Inverted Microscope" in this issue.) Photo credit: Luis I. Larrazabal and Lawrence M. Merin. Cover design by Lawrence M. Merin.
